

Enabling Emergency Alerts in Settings

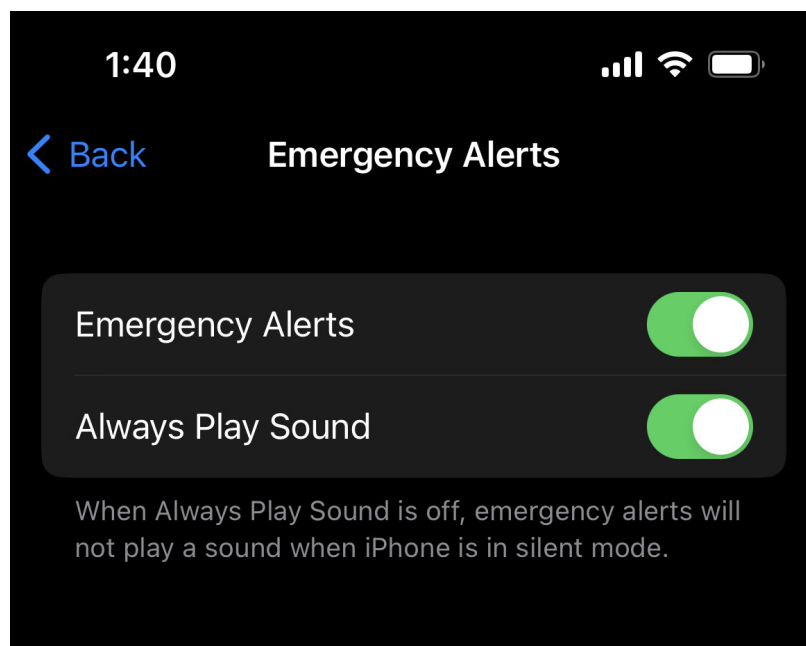

iPhone:

Open the “Settings” App

Select “Notifications”

Scroll to the bottom of the page, then select “Emergency Alerts”

Emergency Alerts should be enabled, as shown below.

Samsung:

Open the “Messages” App

Go to the app’s menu

Select “Settings”

Select “Emergency Alert Settings”

Android:

The way you reach your emergency alert settings will depend on the model of Android phone you have.

Newer models of Android phones will follow the steps below:

Go to Settings > Safety & Emergency > Wireless emergency alerts

Extreme threats, severe threats, and public safety messages should be enabled.
